Objectives

1. By the end of this pilot: We hope to show 50% growth in Vocabulary (if a student chooses the correct answer for 20 words on the first test we expect they will know 30 words by the 2nd test and 40 words by the 3rd test.
2. By the end of this pilot: We expect to show that the students remember 50% of the words after not using the app for 30 days. Therefore, showing that it is easier to remember short parts than long words, that it is easier to remember long words when they know the parts and that this method of tumblers and rapid exposure to related words improves memory and defeats Ebbinghaus's theory of memory decay.
3. By the end of this pilot: We expect to show a lateral comprehension of roots in disparate academic disciplines (i.e. history- chronology, science- chronic, music- synchronicity, English- all of the previous, Spanish- chronologia.
4. Obtain positive results on efficacy survey with teachers and service providers.

I have reviewed the proposed pilot plan summary and agree that, if by the end of this pilot we are able to realize the objectives stated above, our school would be interested and able to make the purchase {of # seats for a discounted \$X for the remainder of the school year} outlined in the proposal dated _____. **I understand that this is not a binding agreement and either party may cancel at any time for any reason, however given the value of the product, the services provided, and everyone's time we enter into this agreement with good intentions to determine educational relevance and benefits.**
